

# ATPL (H) / IR

---

## Key features

- 100% online course – All of our ATPL theory training can be completed online, including the revision classes. When the school reopens you will be able to choose between attending classes online or attending the school.
- Study part or full-time – Study around your other commitments, you choose when you book the online classes.
- Industry leading ATPL instructors.
- Up-to-date question bank – You receive a 12 month subscription to our question bank -BGSONline to assist with your exam preparation.
- No travel costs to attend our online ATPL revision classes.
- No visa requirements, the entire course can be completed from the comfort of your own home from anywhere in the world.
- Payable by instalments.
- You can sit the ATPL examinations in any EASA member state.

## Course structure

ATPL (H) distance learning can progress at your own pace, using our state-of-the-art application – ATPdigital. It is Bristol Groundschool's computer based training (CBT) software. ATPdigital can be downloaded on iPad as well as Windows and Mac PC's. Once you have installed the software it can be used offline allowing you to study from any location. ATPdigital contains the lessons and progress tests that you need to complete during your course. It features in-built testing, interactive diagrams and videos to assist your learning.

Our CBT has been designed to split the subjects across three modules. Each module contains a series of lessons and also end of lesson quizzes to test your knowledge on each subject. You will also have to pass an end of section progress test after a group of lessons, both the quizzes and progress tests contain exam style questions. ATPdigital incorporates a smaller version of the BGS online question bank so you can still carry out practice exams if you do not have access to the internet.

### Each module is conducted from the comfort of your own home:

- You will use ATPdigital and our webinars to learn about the first set of subjects (module 1).
- This will be followed by an online revision week just before your exams. We are an approved examination centre for Austro Control and UK CAA exams, or you can choose an approved centre close to you in your own country.
- You will then repeat this process for modules 2 and 3.

The purpose of the online revision weeks is to consolidate your learning, correct any misunderstandings, and ultimately prepare you for the exams.

**Please note that you must pass all exams within 18 months of your first exam sitting.**

In addition to the revision weeks, there are online webinars, designed to help with any specific problems or questions you have with particular subjects. The live webinars count towards your classroom time requirement.

We also have a library of recorded webinars for you to watch, but these do not count towards your classroom time. There is no limit to the number of webinars you can attend.

## Classroom hours requirement

You must complete a total of 650 hours of learning for your ATPL theory course. 10% (65 hours) of this must be live tuition. This works out at a minimum of just under 22 hours per module. You can meet the hours requirement by attending a combination of online revision weeks and live webinars. Please note the recorded webinars do not count towards this requirement.

## Our ATPL theory course includes:

- **BGS Online** – the leading ATPL question bank
- **ATPdigital** – high quality computer based training
- **Online revision weeks** (3 in total) to help you with any tricky areas and consolidate your learning
- **Webinars** – 4-5 live webinars are scheduled each week for ATPL(A)/(H)/IR . In addition, if there are any specific subjects you're struggling with, we have 200 hours of recorded webinars that you can access.

### Hard copy training manuals are also available as an optional extra.

You have a total of 6 sittings to pass all the exams and no more than 4 attempts at any one subject within those 6 sittings.

Hard copy training manuals are also available as an optional extra. A complete set of printed manuals for all the subjects in the course. The 'loose-leaf manuals' come on high quality paper in full colour, with Bristol Groundschool ring binders.

## Maths and Physics

Before you start the ATPL study, there is a module on Maths and Physics. This serves two purposes; first it is a refresher for you if you have not studied these subjects for a while. Secondly, it satisfies the regulatory requirement that we ensure your level of knowledge is sufficient for the remainder of the course. The Maths and Physics module is conducted in the CBT only and there are no EASA exams associated with it.

### ATPL (H) Module 1:

- 022 – Instrumentation
- 061 – General Navigation
- 050 – Meteorology
- 040 – Human Performance and Limitations

### ATPL (H) Module 2:

- 062 – Radio Navigation
- 021 – Airframe and Systems, Electrics, Power Plant and Emergency Equipment
- 010 – Air Law
- 033 – Flight Planning and Flight Monitoring
- 090 – Communications. This subject has two separate exams: VFR Communications and IFR Communications, but we combine them on the course. \*\*\*

### ATPL (H) Module 3:

- 071 – Operational Procedures
- 081 – Principles of Flight
- 032 – Performance
- 031 – Mass and Balance

\*\*\* You can choose to take your Communications exam as part of Module 2 or Module 3. We include the Comm's lessons as part of Module 2 to allow you to make this choice.

## Which syllabus should I choose?

Please refer to the 2020 syllabus information on our website for further details.

## Examinations

When you have completed each module you may attempt the examinations at a UK CAA Examination Centre or Austro Control. You must register with either the CAA or Austro Control and, unless you are exempt from doing an approved course (for example if you are a military pilot, resitting lapsed exams or converting an ICAO licence), you must get us to sign-off the fact that you have completed an approved course before your exam bookings are accepted. You could sit your exams with any EASA Aviation Authority.

We are a UK CAA and Austro Control examination centre, so, subject to availability, you could sit your exams at our training centre. Bristol Groundschool students are given priority when booking Austro Control exams at our school. The booking system is released to non BGS students near to the actual exam sitting date. For BGS students sitting UK CAA exams the system is controlled directly by the CAA and therefore we cannot adapt this system.

## ATPL (H) / IR Theory Course length

Your ATPL (H)/IR theory course with Bristol Groundschool, as part of your modular path to becoming a professional pilot, will take around ten to thirteen months to complete, during which time you can build up your flying experience, and includes a combination of distance learning and classroom work. There are fourteen exams to be passed for the EASA ATPL, some more difficult than others.

Please note that all the lessons in ATPdigital must be completed before you can attend the revision course or take the examinations. Progress is recorded through a series of short quizzes for each lesson (which require 100% to pass), as well as larger progress tests to conclude each significant section. ATPdigital automatically sends us the results and our instructors are available throughout the process to provide all the support you will need.

Before you start your ATPL theory course, you must have a PPL issued to International Civil Aviation Organization (ICAO) standards. This is a mandatory requirement and you will be asked when you register for your course for your licence number so please ensure that you have this to hand when signing up.

You will finish your PPL with 45 to 65 flying hours and the next flying course, the CPL course, requires you to have 150 hours flying time before you start, which means that you will need to be building up your flying hours alongside studying for your ATPL theory exams.

## Class 1 Medical and Eye Sight Information

We would recommend before embarking on the time and expense of commercial flight training you should satisfy yourself that you will be able to obtain a CPL on medical grounds and therefore get a class 1 medical.

If you have a prescription from the opticians we would recommend you complete the CAA visual system form when you start your training.

## Visa Requirements

If you are travelling to the UK from outside the EU, please note that Bristol Groundschool courses do not qualify for a student visa. You must therefore ensure that you can gain entry into the UK before applying for the course and exams. For further information on visas, please visit the UK Border Agency website.

## ATPL (H) / IR Distance Learning Course Fees

To register for our ATPL(A) distance learning courses, simply visit our shop page to complete our course registration form. You will have the option of paying for your course online by credit or debit card, by bank transfer, cheque or with a credit card on the telephone. You may pay online in GBP or your own currency; a conversion will be made at checkout. Payment by other methods must be made in GBP.

### Our ATPL(H) / IR course fees\* are as follows:

- Module 1 **£1510**
- Module 2 **£470**
- Module 3 **£470**
- Complete package **£2450**

The UK CAA/Austro Control exam fees are not included in the cost of the course. The UK CAA exams are £74 per exam if sat within the UK and can be booked via the CAA website, the Austro Control exams are £65 per exam.

Additional Revision Weeks – Module 1 £832 per week and module 2 and 3 £598 per week.

\* Shipping charges will depend on your location.

Many students opt to pay for one module at a time; if you choose this option you will get access to one online revision week and the related live and pre-recorded webinars for the module purchased. If you have bought learning materials that require posting to you, this will be done as soon as your registration has been processed.

Once we are able to offer face to face classroom tuition again, if you choose to attend you will need to budget for travel, food and accommodation for the duration of the revision course. There is a comprehensive directory of local accommodation in the student information section of this website.
