As a Woodward-approved Licensed Repair Service Facility (LRSF) for the Woodward Fuel Control Unit (FCU) range for the PT6A Large engine series, our customers in Europe and Africa now have this product supported along with our other Woodward capability of Propeller governor and Over Speed governor for the entire PT6A engine range.

As a TAE Aerospace customer, you also have access to our PT6A MRO workshop's engine overhaul, repair and Hot Section Inspections (HSI) capability located at the same facility.

With our one-stop Woodward approved facility, you can expect a cost effective solution with fast turn times, competitive freight costs and over the phone customer support.

You can also access our after-sales and AOG support.

Our new approval complements our long-standing Honeywell-approved Authorized Warranty and Repair Station (AWARS) FCU work for small to medium PT6A engines.

Visit our [website](#) to find out more about our comprehensive PT6A services and contact one of our sales support staff to find out more about:

- fuel control units
- prop governors
- starter generators
- over speed governors
